

PSQL v9 SP1 (9.1)

Number	Component	SubComponent	Synopsis
50799			Linux MKDE hangs after running RII & btrtest apps for 2 days
51693	communication	comsrv	ESC 2191: BSPXCOM hangs on exit if SPX not installed on NW
51033	core_audit	monitor_audit	Unlimited user count AuditMaster license ignored
52252	demo_fts		Need sample Java client as an example of an FTS client
51179	devcore		Crash in XLT running DTO catalog APIs
51262	devcore		dbnames should allow spaces in DTI and utils
50818	devcore	mkc	MKC CBTRCall m_keyLength should be int, not byte
51593	devcore	mkc	Status 5 on Insert with SELECT DISTINCT
51892	devcore	mkc	Status 6 on insert when file opened in static cursor mode
51375	devcore	poolman	Perf: Atomics Random Selects show drops for V9 WGE
52173	install_fts		Start Menu link needs to be renamed and placed in the correct level
50902	install		Clicking Manifest menu does not find the file
51176	install		Install is installing utility files no longer needed
51286	install		New location for (and new) text versions of license agreements
51419	install		default workgroup license is wrong
51450	install		In every screen of Install screen wizard V9.0 is not replaced by V9.1
51451	install		In Registry entry under install info the Version option is still showing V9 instead of V9.1.
51452	install		There are only two types of installation custom and complete but in ptksetup.ini says it has three options (typical,Custom,Network)
51455	install		License Key under [License] section is not working when HideLicenseInput key is set to "No".
51457	install		In Ptksetup.ini,PCC key in [Features] section is not working for PSQL WGE.
51458	install		Few options under [PSA] section in Ptksetup.ini are case sensitive
51460	install		In ptksetup.ini ReadMe Key under [Common] section is not working.
51475	install		In Ptksetup.ini,ArchiveDestination key under [PSA] section is not working.
51536	install		Linux build shouldnt build libodbc.so & odbctest
51547	install		License Administrator Not loaded.
51550	install		Repair option not working in P.SQL Server/WGE
51552	install		In Ptksetup.ini,when LogfilePath key under [PSA] section is given a user defined path its giving some error screens during installation of P.SQLServer/WGE,not for P.SQL Client).
51553	install		Archive operation in P.SQL Client is not removing the two registry entries namely Monitor,Rebuild
51554	install		In Ptksetup.ini,when the Icon key under [PSA] section is set to "No" ,then after installation the in Ptksetup.ini which will be under Pvsw folder contains a value "Yes" for the Icon key.
51555	install		In Ptksetup.ini,the TestNetworkCommunication,TestRelational,TestTransactional,NetworkTestTarget Keys under [PSA] section are not working in case of P.SQL Client
51558	install		In Ptksetup.ini , LogIconName Key which will be under [Common] section is not working.
51566	install		In Ptksetup.ini for WGE,HideLicenseInput Key is set to Yes by default.
51569	install		All SSP's are not Loaded properly after Installation
51580	install		Install: PSQL rpm for linux not installing command line utilities
51603	install		For Netware,In Ptksetup.ini,if we set HideLicenseInput Key under [License] section to "YES" then the default destination path in the "Destination path for PSQL files" screens are showing D:\System and D:\Pvsw respectively.
51617	install		Version in PSALog.txt file is showing 9.0
51632	install		When upgrade install (V8.6 FCS -Bid#192.033 + V9 SP1) done on win ME, The Pervasive.SQL V8 Workgroup (v8.6) entry in Add/Remove programs is not getting removed
51633	install		When upgrade install (V8.6 FCS -Bid#192.033 + V9 SP1) done on win ME, PCC is not opening when we run it from start>run, gives error
51634	install		Utilities Key and PCC Key not Working in Windows 2003 server .
51637	install		An empty Psqlinst.log file is getting created under C:\Pvsw during Silent installation of P.SQL(Server/Client/WGE)

51638	install		After Silent installation of Server when we open Tools Menu in PCC we find only one entry that is ODBCAdministrator entry .
51649	install		BUILD should not make the netware ODBC Driver Manager (DM)
51650	install		Linux rpm's should install & uninstall UnixODBC Driver Manager and sample program
51651	install		Netware install should'nt copy iodbc DM (odbc\iodbc.nlm)
51655	install		When Silent upgrade install (v8.10 FCS - Bld # 117.026 + V9 SP1) done on Win2K Adv Server, then uninstall PSQL and PSA from Add/Remove programs still the start>programs>pervasive in left and showing as empty
51657	install		When upgrade install (v8.6 FCS - Bld # 192.033 + V9 SP1) done on Win2K Server, then uninstall PSQL and PSA from Add/Remove programs in registry under Pervasive Software the Monitor Utiltiy, Rebuild Utility are not deleted
51667	install		Utilities Key and PCC Key not working during silent installation of WGE in WinME.
51681	install		Default value for RunSilent Key is "No" in Ptksetup.ini.
51683	install		In Win2kProf.Japanese and Win2kServer Japanese ,Under Docs folder in PSA folder no file(HelpFiles) is present except Manifest.csv
51686	install		If we give the userdefined name for ReadME key in Ptksetup.ini,then after installation the name of the ReadMe file is getting changed but we are unable to open the ReadME link in registration.Html.
51704	install		When upgrade install(v8.7 FCS - Bld # 002 + V9 SP1)done on Win2K Pro, see in Add/Remove Programs the Pervasive.SQL NT Server v8.70 is not removed
51708	install		LogIconName key not working during Silent installation of WGE in Win2kServer and Win2kProf.
51714	install		Pick up docs from correct location
51727	install		PSA NetworkCommunicationTest screen is not running during Client installation
51792	install		BB: Point builds change libodbc.so file name
51852	install		uninstallation of netware is not proper during upgrade installation
51861	install		PSA is not getting installed during the installation of P.SQL V9.1 Server.
51872	install		Error opening HTML page at the end of the Netware Installation.
51874	install		In Linux,If we install PSQL Server/Client using tar files and on top of it if we try to install PCC using RPM then it is throwing error saying "No installation of Pervasive.SQL-Client or Pervasive.SQL were found"
51879	install		P.SQL Server for Netware.msi ,Set.exe and ptksetup.ini file are getting placed under SYS volume after the installation of P.SQL Server onto Netware machine.
51912	install		Logfile key not working in ptksetup.ini during silent installation.
51913	install		Installation of PCC in linux is checking for JRE version 1.4.2.28.
51927	install		Many keys in Ptksetup.ini are not working for Netware.
51928	install		pvswwcore key ,License,HideLicenseinputkey are not working in Ptksetup.ini in case of Windows.
51102	install	psa	Update PSA Installer images
51384	install	psa	Enable [PSA]->Install key in ptksetup.ini
51385	install	psa	Enable [PSA]->Icon key in ptksetup.ini
51386	install	psa	Enable the [PSA]->RunSilent key in ptksetup.ini
51470	install	psa	NT server engine install not including PSA
51674	install	psa	After client upgrade install(2000i Sp4 - Bld # 251.005 + V9 SP1)done on win 98, restart the machine and invoke PSA and test network communication, transactional and relational engines, and all of tests fails
51741	install	psa	When Server upgrade install (v8.10 FCS - Bld # 117.026 + V9 SP1) done on Windows 2003 Server, Archive and then Restore V8 and then the Pervasive services are not present in Administrative tools>Services
51742	install	psa	When Server upgrade install (v8.10 FCS - Bld # 117.026 + V9 SP1) done on Windows 2003 Server, Archive and then Restore V8 and clicking of pcc gives error 'Locale Manager has failed to load resource'
51743	install	psa	When Server upgrade install (v8.10 FCS - Bld # 117.026 + V9 SP1) done on Windows 2003 Server, Archive and then Restore V8 and clicking of Pervasive.SQL v8 or What's new in documentation menu shows V9 documentation
51775	install	psa	When Silent upgrade install (v9.00 FCS - Bld # 66.01 + V9 SP1)) done on Windows 2003 SMB Server, Try to Archive from PSA and here we find v8 entry
51776	install	psa	When Silent upgrade install (v9.00 FCS - Bld # 66.01 + V9 SP1)) done on Windows 2003 SMB Server, Archive and Restore then Pervasive.SQL 9 related menus appear in start menu and in Add/Remove Programs
51067	install	psqlunix	linux install: needs to generate systemdb and psp_* on the fly

51072	install	psqlunix	linux install: redirect output from pvddl and dbu to psql/pvinst.log file
51127	install	psqlunix	Linux install: sample.btr upper.alt need to have write permission for psql
51128	install	psqlunix	Linux install: use "su - psql" instead of "su psql"
51564	install	psqlunix	Java Version Check in the Linux PCC RPMs is dependent on the flavour of Linux being used
51645	install	psqlunix	Linux PCC tar laying down directories/files in wrong location
51648	install	psqlunix	Wording changes needed in Linux postinstall shell script
51788	install	psqlunix	Readme files missing from Linux RPM & tar doc installs
50942	install	psql	BDU resource bundle is not registered on Win32 and possible on Netware
50963	install	psql	Win client link to registration doc comes up minimized
51190	install	psql	WGE install not migrating settings
51387	install	psql	Enable the [Common]->Folder key in the ptksetup.ini
51388	install	psql	Enable the [Common]->RegistrationShortcut key in ptksetup.ini
51389	install	psql	Enable the [Common]->LogFile key in ptksetup.ini
51484	install	psql	Install need to create product registry entries on Linux
51578	install	psql	NW install from W2K fails due to permission error running sleep.exe
51608	install	psql	GUI license manager returns - "No resource DLL available"
51669	install	psql	unable to upgrade 9.0 -> 9.1
51821	install	psql	Wrong vsldos.ini being installed on NT/2000/XP machines.
51823	install	psql	NW install: psregsvr.ini entries invalid
51882	install	psql	Netware Server Installation getting invoked when we Mapped Netware drive in Windows98 system.
51400	install	setopt	Enable [Common]->InstallType key in the ptksetup.ini file
51401	install	setopt	Enable the OUTPUT KEY [Common]->Status in ptksetup.ini
51402	install	setopt	Enable the OUTPUT KEY [Pervasive.SQL Engine]->DSNMigrateSuccess in ptksetup.ini
51800	install	uninstall	Need uninstall script(s) for Linux PCC and maybe for JavaHelp
51181	interface		Driver Not capable error using ODBCtest or ADO/Bridge
51791	interface		comp\sdk\jcl\jni .d files busted
51243	interface	oledb	OLEDB leaks memory on running simple insert loop
44822	mkde		ESC 2051: Running the NW's Installer.NLM hangs if CNString is loaded
51149	mkde		OLEDB corrupts data when appendchunk is used
51157	mkde		ESC 2057: UpdateChunk returns st 103
43436	mkde	cache_engine	System error 116.-3.0 reported when running bcheck concurrently on multiple files
50938	mkde	cache_engine	Cache engine crash with Auto Reconnect enabled during 7 day stress test
50951	mkde	cache_engine	Cache Engine fails on netware when a btrieve client uses a URI
50966	mkde	cache_engine	Workgroup Cache Engine returns 54 on Get_First during 7 day stress test
51041	mkde	cache_engine	status 8 rtned from Linux engine running Btr DOS app.
51132	mkde	cache_engine	WGE\CE GPF due to issues in SRDEupdate code
51261	mkde	cache_engine	MKDE/CE: File corruption reported when workgroup engine caches a file once and later directly accesses it.
51339	mkde	cache_engine	Cache Engine hang during stress test; APIP/StepNext deadlock
48765	mkde	mkde	4GB delta file results in 32 empty extension files
49937	mkde	mkde	Closing file using B_CLOSE_TEMP API not succeeded
50472	mkde	mkde	MKDE: ISRs cannot be accessed through Cache Engine
51145	mkde	mkde	status 2 returned fromn btrtest.exe
51226	mkde	mkde	Status 2 and 54 with ChunkInsert from PvStress test and Blob
51237	mkde	mkde	ChunkInsert and ChunkDelete make changes on a primary page.
51299	mkde	mkde	ChunkInsert data corruption - FreeVarPage chain
51304	mkde	mkde	ChunkInsert Data Corruption, VAT node split
51306	mkde	mkde	MKDE/CE: status 2, 54 may mask network errors
51307	mkde	mkde	MKDE: hang when unable to delete old log files.
51355	mkde	mkde	Add a registry setting for the MKDE reject count.
51765	mkde	mkde	W2003s GPFed running stress tests

51820	mkde	mkde	Running maxfile causes ntmkde to crash on sys with low disk apace
51856	mkde	mkde	ESC 2231: Validate request is logging invalid requests from brequest that are in fact valid.
51947	mkde	mkde	Crash in MKDE running Blobtest on v9.10
50855	mkde	nt	MKDE crashes when CO delta files exceeds 4G
50949	mkde	nt	Perf: MKDE GPF running TPC-C ODBC on W2K3 Server
51133	mkde	nt	Win server hung after running stress tests for 2 days
50994	mkde	nw	license mgr crashes when accessing product.dat file on NW
51064	mkde	nw	pssax needs to be added bstop.ncf to unload pscore2.nlm
51087	mkde	nw	bstop.ncf missing confmrb.nlm & cobolrb.nlm
33271	mkde	unix	UNIX - Call to ConTop w/empty file list rtns status 2
51063	mkde	unix	invalid status 26 rtned from crt Index to Lnx server mkde
51562	mkde	unix	UPI cannot connect locally on Linux
49976	psql		Need a new DTI function for getting stat info on a file.
50339	psql		Japanese character from CR 49919 converts to "?" in mkde
50922	psql		Get error when trying to access V8SP2+V9 installed netware server from client PCC.
50932	psql		Eclipse Plugins: Company/Provider name inconsistent
50974	psql		DTI API PvCopyDatabase is not working for the Case sensitive path.
51050	psql		PvCopyDatabase deleting the file.ddf (from the destination location), if the destination dictionary already exist.
51073	psql		While calling the DTI API PvCopyDatabase(), Netware abend happens on NW 6.0.
51103	psql		Linux: resolve symbol name collisions
51126	psql		Linux: symbol name collision fixes - part 2
51168	psql		[Cobol Features]CobolSchemaexec does not return the correct error info
51193	psql		NTDBSMGR: delete table with PCC and close DB connection causes GPF
51397	psql		Perf: Blob test hung on W2K3 (the big server)
51398	psql		CM: Components have wrong build info
51405	psql		[Cobol Features]:Allow INSERT on Variant record Tables
51406	psql		Select GPF'S When used as 'select * from test1 where a in (select a from test)'
51421	psql		java.io.EOFException on large tables
51473	psql		Registry entries are not getting removed after archiving them.
51474	psql		After archiving fully ,under PVSW\Bin ,the folders namely Pcccfg and logs still remains .
51500	psql		Interface for new DTI API PvGetTableStat() not initialized properly.
51548	psql		In WGE,After Restoring through PSA we are unable to open any of the DSN's.
51567	psql		In Netware ,when running Test for Transaction Engine through PSA from client machine ,though we give the correct path its asking again for correct path.
51572	psql		DTI usage in DX GPF's ntddbsmgr
51584	psql		mkded crashes when shut down with files open and BackupAgent is turned on.
51591	psql		PvGetTableStat() returning general failure when table does not exists on linux.
51597	psql		The Version Level option under PSA in Registry is showing 9.0
51598	psql		PSA is taking invalid path by default while running PSA Transaction test only when P.SQL Server installation is done in silent mode.
51599	psql		Unable to run transactional engine test successfully in silent mode in P.SQL Client.
51600	psql		Build Level option in Registry is showing 0.
51601	psql		In bti.ini Build Level = 0 (should be 7)and Version Level=9.0(should be 9.10)
51604	psql		When PSQL Netware is installed cobolschemaexec [folder] and sample.btr [file] are missing under PVSW\samples from build 004.000 onwards.
51616	psql		In Registry, P.SQL Client entry under products is remaining after archiving; because of this restoring is failing
51619	psql		'Dsn' is treated as reserved keyword in Psql V9.1 but not in V9
51623	psql		PCC:Refresh button is not working properly while renaming.
51665	psql		In P.SQL Server,Archiving and restoring through PSA is creating an additional entry for P.SQL WGE in Registry under Pervsaive Software.

51685	psql		In WinME/Win98 ,archiving through PSA is not removing the P.SQL 9.1 entry from control panel
51711	psql		Get error Btrieve 8097 when trying to create a table with period in name.
51724	psql		Running PSATests in silent mode(using the command) sometimes transactional and sometimes relational engine are failing,when P.SQL9.1 WGE is installad in Normal/Silent mode.
51726	psql		During Archiving,we can find P.SQLV8 entry as a selecting option for archiving.
51747	psql		PSP_Column_Rights Requires Database Name
51751	psql		Long stored procedures do not display properly in the Text window when extracted via "call psp_help_sp()"
51762	psql		psql.ico,Pervasive.SQL.isu files are remaining under pvsu folder when upgrading P.SQLV8.7Build#002.000(Client/Server) with P.SQLV9.1 (Client/Server)
51780	psql		Archiving through PSA is not archiving the Monitor and Rebuild entries in the Registry,During Silent Upgradation in Windows 2000 Advanced Server from P.SQL WGE v8.6 FCS - Bld # 192.033 + FTF Bld # 196.024 to P.SQL V9.1.
51866	psql		Bookmark fetches with FixedLength bookmarks do not take the offset to the server
51921	psql		Unable to modify a row value from PCC
51935	psql		During upgradation from lowerVersions to P.SQL 9.1,V9 entry is present under PVSARCH folder.
51080	requester	clntres	Update the Splash screen to the lizard eye
50964	requester	mif	SCM logs are messed up for variables passed for the string
51008	requester	mif	idsos regression failing to NetWare
51531	requester	mif	w3scmv7.dll GPF on win16 application exit if no RESET issued
51659	requester	mif	Multithreaded Clarion app hangs as one thread terminates
51855	requester	mif	ESC 2122: Crash in WGE when a particular Japanese named user accesses local engine
51315	requester	nsf	SQL doesn't connect if SPX address found via Named Pipes
51183	sample		SQLDescribeCol() fails with bookmarks
52071	searchengine_fts		service dependencies are missing/incorrect
50013	sql		Performance: Optimize INNER JOIN like implicit joins.
50076	sql		Join returning error instead of result set.
50078	sql		Join returning temp table error instead of result set.
50140	sql		Performance: Improve table order processing optimization on three way join.
50491	sql		Further improvement to outer join check.
51037	sql		Key 4 of system table X\$Field has incorrect segments
51131	sql		Performance: Use MKDE percentage op (code 45) for cost estimates.
51165	sql		INNER JOIN and pointless OUTER JOIN conversion skipping rows.
51166	sql		Performance enhancement 45779 is broken.
51180	sql		Performance: Improve combined join and DISTINCT (or GROUP BY or ORDER BY) optimization.
51197	sql		Performance: Improved ON Condition Optimization Part II
51199	sql		Performance: Ignore literals when optimizing DISTINCT, GROUP BY and ORDER BY.
51214	sql		Performance: Improved MIN/MAX Aggregates Optimization
51232	sql		SQL returning truncated data when "order by" is used
51246	sql		Performance: Refinement to 51130. Best index not chosen.
51281	sql		Performance: Support for INDEX hint syntax.
51294	sql		Performance: Session level support for query plan file generation.
51333	sql		Performance: Support for global variable @@QRYPLAN.
51382	sql		Support for CREATE/DROP DATABASE SQL statements.
51408	sql		Index names greater than 20 characters corrupts X\$Field.
51420	sql		GPF in w3sqlmgr if SQLSetPos(SQL_ADD) long data.
51469	sql		Data not inserted on SQLSetPos(SQL_ADD) with SQL_LEN_DATA_AT_EXEC.
51583	sql		ODBC admin hangs on exit if ISA firewall client is installed
51586	sql		Pervasive.SQL V9 is fetching duplicate records.
51695	sql		Create View statement does not work if using JOIN
51922	sql		Application is getting crashed when Odbctest suite ran for Allocstmt testcases on build 16.000.
51287	sql	client	Query returns "Invalid descriptor index" with Forward-Only cursor and SQL_UB_ON

51295	sql	client	V9 PDAC status 8 failures.
51353	sql	client	Error executing a Select on a "longvarchar" column when OEM/ANSI option is ON.
51506	sql	client	"Invalid Type" error message running an Insert query using ADO with ODBC Bridge
51746	sql	client	"Table name is too long" error calling the ADO.Delete method
51017	sql	drm	metadata file corrupted afer create index fails
51047	sql	drm	Getting column data "Data-At-Exec" on View text fails.
51096	sql	drm	Issue in Renaming a View on few of the Windows OS
51380	sql	drm	Alter a NOT NULL column to a NULL column corrupted the table
51438	sql	drm	Server hangs once a day, 40 users using ODBC
51444	sql	drm	Hang on new Index creation
51471	sql	drm	Primary table is corrupted when adding a child table in different session
51480	sql	drm	Stress: Blobstress test recieves (Btrieve error 2)
51487	sql	drm	Engine GPFed when running create/alter table scripts.
51509	sql	drm	1 failure in BugsRegression
51678	sql	drm	The "default" column attribute does not work when an empty string is specified as default value
51771	sql	drm	7 failures in DDLINSP only on NetWare with timestamp and DST
51899	sql	drm	Crash in engine using VBScript with a UNC path
49686	sql	sqlengine	SP: Support UPDATE/DELETE with optional FROM clause in stored procedures.
50819	sql	sqlengine	Engine allows user to drop IDENTITY column index
50933	sql	sqlengine	Using ';' char in password locks user out of database

51587	sql	sqlengine	W3odbcei.dll crash running following query with forward only cursor.
51595	sql	sqlengine	Unexpected Error in SSP and Tablesubquery test suites during executing SRDE regressions
51613	sql	sqlengine	column order in the result was wrong when calling SP
51614	sql	sqlengine	Delete is deleting incorrect number of records when use with IN clause.
51658	sql	sqlengine	SRDE regression Abend on Netware6.0 Japanese platform
51733	sql	sqlengine	[PCC]Able to create a view and table with same name
51770	sql	sqlengine	A Maximizer query fails or crashes in psql9.10

51785	sql	sqlengine	"currency not on record" error using Forward only cursor
51829	sql	sqlengine	In the TestCase(TestCase: pa.OutputParameters) of OLEDB regression, the 'Output Parameter using NUMERIC datatype' is failing
51844	sql	sqlengine	Query generates Dr Watson in ntbsmgr
51869	sql	sqlengine	Memory leaks in SQLMgr
51101	sql	sqlmgr	NW server abends in 8.6FTF nwsqmgr while running AM stress
51265	sql	sqlmgr	NetWare server hung after 5 hours with 150 Btrieve connections and 250 SQL connections.
51867	sql	sqlmgr	Fix odbc client backward compatibility issue in V9 (reference esc 2205)
51209	sql	sql	Netware:AllDate,AllCDefault,AllSp,RI test suite failed due to double and float datatype
51479	sql	sql	Unexpected Behaviour while converting TIME to SQLDATE
51824	sql	sql	Overwriting existing Engine DSN abends NW server
50985	utapps		DDF:Add icon not available on tool bar
50986	utapps		DDF: Not able to use keyboard for specifying table definition
51024	utapps		Not able to see Default db & demodata on refresh
51026	utapps		[CobolFeatures]Selects on Numeric and Float values are not working in some cases.
51027	utapps		[CobolFeatures]Pdf's on redefines are not working for some cases.
51043	utapps		DDF: Builder when launched from different locations shows different views.
51075	utapps		DDF: newly added database doesn't show up until manual refresh of tree
51093	utapps		[CobolFeatures]CobolSchemaExec creating a table in database even if btrieve file name missing in the xml file.
51135	utapps		DDF:incorrect error message
51154	utapps		DDF:adding & deleting server to ddf builder is not working properly
51173	utapps		Utilities plf files have incorrect version info
51174	utapps		Change registry location for V9 licgen Utility
51175	utapps		Update PSA unique version files
51247	utapps		DDF: JCL position allows you to go past the end of the file
51248	utapps		DDF: add auto-format capability to JCL/SQL preview composite
51249	utapps		DDF: add copy based on file definition - major component drop
51250	utapps		DDF: autoexpand tree at startup like PCC does
51251	utapps		DDF: multiple/duplicate entries in Btrieve key segments
51252	utapps		DDF: need to ensure that all refreshChildren methods work in the facetsets
51254	utapps		DDF: implement welcome editor part like PCC to reserve the desktop space
51255	utapps		DDF: index editor needs to create indexes in dictionary properly
51302	utapps		DDF: import wizard should support subset of columns
51303	utapps		DDF: string type in last column of person reads garbage
51323	utapps		DDF: CLOB type is not correctly displayed
51327	utapps		COBOL: can't update table with 01 level redefines
51350	utapps		DDF:database security violation
51366	utapps		Not able to remove Permanent License when the Licenses are "Hide Expired"
51409	utapps		[Cobol Features]Select statements on occurs child tables using some columns are returning incorrect number of rows.
51476	utapps		[Cobol Features]Updates on cobol tables giving error message "Data buffer too short(Btrieve error 22)"
51499	utapps		Wrong license generated (v8 to v9 upgrade)
51534	utapps		[Cobol Features]Cobol Record tables contain no data or junk data,When we open tables using PCC for first time
51664	utapps		DDF: Create table definition - Insert field does not work
51672	utapps		DDF: Create table definition - "Delete field" does not work
51677	utapps		Need linux script files for monitor and config utilities
51723	utapps		DDF: Export fails if the table has null values
51757	utapps		DDF: Delete .mkd file gives an error
51758	utapps		DDF: Rename index fails
51863	utapps		CobolSchemaExec doesnt handle the case, when a valid quoted identifier is specified in IndexSegment name
51897	utapps		Documentation returned by running BCFG is incorrect

51803	utapps	ddfbuilder	Delete from datapath causes issues
51804	utapps	ddfbuilder	Export Error
51806	utapps	ddfbuilder	Import Data 'Next' button not working
51813	utapps	ddfbuilder	DDF: The title of the Import Data wizard says "Export SQL Data"
51878	utapps	ddfbuilder	DDF: Create Btrieve file failing
51887	utapps	ddfbuilder	DDF: Refresh after adding Database removes other entries from the tree
51910	utapps	ddfbuilder	DDF: Database is allowed to be deleted even though it is in use
51930	utapps	ddfbuilder	DDF: do not allow Table column names to start with a special character
51931	utapps	ddfbuilder	Export data Overwrites files without asking
51932	utapps	ddfbuilder	Poor implementation of ASK TO OVERWRITE
51098	utapps	functionexec	Update Function Executor with the Lizard Eye
51759	utapps	functionexec	The version of Function Executor is still showing 9.00.
51822	utapps	gateway	pvlocate.exe (WGE gateway locator) version information says 8.15
50991	utapps	javaconfig	command line config utility has wrong usage help
51377	utapps	monitor	Utility Monitorcli and configcli contain text strings
51535	utapps	odbcsetup	Linux rpm should not bundle the ODBC Driver Manager
49277	utapps	rebuild	Status 170 from Brebuild with classic security
51158	utapps	rebuild	ESC 2060: Rebuilding data file is removing RI information.
50929	utcorefunc	upi	dti allows only 10 connections per app, 10 unclosed PvOpenDictionary to remote client
51394	utcorefunc	upi	PSQL doesn't start after calling DTI APIs from within MKDE
51430	utcorefunc	upi	ESC 2133: creating a DBN or DSN after PvConnectServer("localhost") = 7011
48844	utpcc		When setting up user security via the PCC GUI and if the table name is Sql Keyword get NULL error message (a dialog titled "Pervasive Control Center" with a red X, but no message).
50732	utpcc		Help system not working for DDF Builder
50784	utpcc		Executing some statements in database with long names gives errors
50924	utpcc		PCC:Password field should not accept special characters
50940	utpcc		Not able to create table from an mkd
50955	utpcc		PCC: client install won't find external utilities if not installed in c:\pvs
50976	utpcc		DDF: table designer needs to handle spaces in column names
50980	utpcc		DDF Builder does not inform you of stat 161 out of licenses
50981	utpcc		DDF:Not able to create database, if created from individual db
50990	utpcc		Exiting after error causes javaw.exe to use 99% CPU utilization
51048	utpcc		PCC:Properties of engine are not consistent
51054	utpcc		PCC:Permissions are not assigned properly for the userdefined tables
51060	utpcc		DDF: log into DB for SQL table view does not update decorator
51094	utpcc		PCC: replace graphic on preference page
51119	utpcc		in SuSE9, creating a database at ' ' succeeds, and the database is created in pvs/bin
51122	utpcc		PCC:Problem with configuring the server engine
51170	utpcc		PCC.exe doesn't have any version information
51171	utpcc		PCC: Issues in Table properties->Index tab with Duplicate option
51188	utpcc		allow other plugins to add to tool menu
51201	utpcc		PCC: In setting security to database, Password field accepts space(Blank character).
51242	utpcc		PCC:Password Field accepts special character(')and blank character .
51244	utpcc		PCC:Column name in a table accepts blank space.
51309	utpcc		DDF: Highlight in HEX view is wrong
51322	utpcc		PCC fails to create database which points to japanese char dir
51335	utpcc		Setting permissions on user fails
51363	utpcc		Restore default is not working properly for 'Compatibility property of server engine.'
51414	utpcc		Add psql install registry keys for linux PCC
51431	utpcc		PCC on linux does not display property checkboxes labels

51434	utpcc		Wait Lock Timeout default value through bcfg Command Line utility differs from the PCC settings.
51435	utpcc		Minimal State delay default value through bcfg Command Line Utility differs from the PCC settings.
51436	utpcc		Sort Buffer size default value through bcfg Command Line Utility differs from the PCC settings.
51437	utpcc		Transaction Log Size default value through bcfg Command Line Utility differs from the PCC settings.
51465	utpcc		PCC:Index sorting order is not changing to descending order eventhough we changed.
51478	utpcc		F5 hotkey to refresh the DB navigator tree does not work
51481	utpcc		PCC : Not able to edit the view with special characters
51537	utpcc		PCC:Not able to edit the stored procedure
51541	utpcc		PCC:Not able to create an view and procedure when the security is enabled by using GUI
51543	utpcc		PCC:Not able to rename index with "!"@#\$\$%^&"
51570	utpcc		PCC:Not able to Edit the table when Index is created
51607	utpcc		PCC: Not able to Open 'Export' Utility
51624	utpcc		PCC: Restore Defaults is not working for Btreive Security Policy
51642	utpcc		PCC is not allowing to create a dbname with spaces
51644	utpcc		[PCC]:"Restore Defaults" option is not working for Engine's "Information Section"
51663	utpcc		CLI:Unable to connect to remote server thru bcfg command
51668	utpcc		PCC not adding local server and client on Linux
51684	utpcc		PCC: restore defaults option is not working for Database security
51687	utpcc		PCC: Not able to alter a table thru UI having the name "t1.mkd"
51715	utpcc		Update pcc script file to allow user to specify options
51734	utpcc		PCC:Not able to open the log file
51735	utpcc		PCC:Not able to return all rows in Grid
51801	utpcc		ESC 2219 : Syntax error when scrolling result backward/forward in PCC grid
51802	utpcc		PCC: ScrollBar drag to end generates error
51808	utpcc		bcfg utility on Linux throws exception
51810	utpcc		PCC:Restore Defaults option is not working for General options in preference pages
51842	utpcc		Unable to access/set client properties with Linux PCC
51845	utpcc		PCC: Add table stat information to PCC
51877	utpcc		Update JNI wrappers to be consistent with updated PvGetTableStat() signature
51900	utpcc		Remove -consoleLog option from the pcc script file
51934	utpcc		Executing to some queries to Text or Grid, throws numberformat Exception
51057	utpcc	config	NullPointerException when clicking on "Local Client"
50915	utpcc	console	PCC: help --> View Log produces an error
51015	utpcc	sqldm	SQLDM won't allow users to created DB with "V:?"<>/" chars in name.
51106	utpcc	sqldm	trigger is not created with PCC
51344	utpcc	sqldm	F5 hotkey to refresh the data grid does not work
50996	utpcc	tabledesigner	Creating a duplicate table, deletes the old table
51004	utpcc	tabledesigner	Table designer does not prevent user from dropping SMALLIDENTITY index
51097	utpcc	tabledesigner	PCC:Unexpected exception occurs when data is added to foreign key column.
51334	utpcc	tabledesigner	Changing the order of index segments does not set dirty flag
51579	utpcc	tabledesigner	PCC: Table editor shows incorrect modification flag for indexes
51177	utwizards	psa	PSA .dat files need to be updated
51198	utwizards	psa	PSA misclassifies psql8.x install files
51351	utwizards	psa	PSA archives COSMOS key from the registry entry.
51449	utwizards	psa	Pervasive programs start menu location changed. PSA need to archive the updated location
51630	utwizards	psa	PSA deletes Pervasive.SQL startup menu reference from local machine when tried to delete PSQL Netware from mapped drive.
