

Pervasive.SQL V8 SP3 (8.7)

Number	Component	SubComponent	Synopsis
32502	install	psql	Choose Supported Protocols using Ptksetup.ini.
44822	mkde		ESC 2051: Running the NW's Installer.NLM hangs if CNString is loaded
49449	sql		esc 1831 - memory corruption after simple query, then SQLFreeStmt(SQL_DROP)
49457	sql		Daylight savings time conversion is incorrect.
49474	mkde	mkde	ESC 1864 : Problems with UNICODE string data sort order for Btrieve WSTRING keys
49477	utwizards	checkdb	File type for the Database check Wizard's report is missing last the last few letters
49478	sql		Performance: Not choosing best index for restriction optimization.
49481	sql	sqlengine	Support " != " as an alternate form of "not equals".
49492	mkde	mkde	Make URI param "dbfile" work with a DDF
49498	sql	sqlmgr	Problem with SET TIME ZONE - 'Dr. Watson' error
49505	sql		Esc 1879: unnecessary expression evaluation error returned.
49509	sql		ESC 1882: Stored view with DISTINCT improperly merged.
49513	utwizards	psa	PSA printout of loaded modules is headed by a date with formatting letters still in place
49516	psql		Create pWaitVol
49517	interface	oledb	Max columns in OLEDB is hard set to 255
49527	sql		Need to connect as user PUBLIC.
49528	utpcc	config	Use Thunk missing from PCC
49532	utwizards	psa	PSA log file type selections are in English
49543	utcorefunc	upi	Local PvGetDbNamesData returns 7004 when over 409 DbNames
49559	mkde	nt	Domain users in local Administrators group failing DTI login
49562	sql		27 failures in owner test suite.
49566	install		English Install runs Japanese MDAC 2.5
49571	sql	drm	Japanese named databases cannot be created in Japanese named folders
49572	mkde	mkde	When the NetBIOS protocol is not working, an error in PVSU.log says that an unknown protocol could not be initialised
49573	mkde	mkde	See esc 1859 : Query returns incorrect results Version 8.5 or 8.6
49576	mkde	mkde	Bregress fails with status 175
49577	mkde	mkde	System errors recorded in PVSU.log list Japanese filenames as garbled characters
49578	utwizards	createdb	Create table Wizard gives no warning/error when ddfs cannot be created
49585	sql	sqlengine	Engine crashes running a stored procedure in ADO using ODBC.
49628	sql	sqlmgr	GPF in SQLMGR if parc enabled on client but not server
49631	sql	sqlengine	Want to make current version of SRDE to optimize on Btrieve Null key
49641	sql	sqlengine	Blob Performance test shows memory leak in w3odbcei V8SP2
49648	sql	sqlengine	"Column should be in Group By" error trying to use Convert and Max scalar in Select
49666	sql	sqlengine	While printing a value in a sp the last character is trimmed off
49673	sql	sqlengine	returning incorrect number of records with a Select when the data being deleted from the same table by another application
49678	mkde	mkde	LINUX: MKDE crashes on "pvbackup -on" with 800 files
49688	interface	oledb	OLEDB can't connect using latest MKDE FTF
49693	mkde	mkde	Status 72 seen when database is put in Japanese named directory
49754	utwizards	createtable	Similar Japanese named tables cannot be created.
49774	mkde	mkde	PSQL 9 : F4 Solve MDKE and DRM memory contention problem.
49784	sql	sqlengine	Support implicit char->numeric conversion
49789	interface	oledb	SQL "IF" function does not work when used via the Pervasive OLEDB
49793	sql	sqlengine	SP: incorrectly exit out of the loop after hitting the end of the file.
49797	mkde	mkde	MKDE creates delta files when ContOps is attempted on temp files.
49798	sql	drm	A long Japanese table name in Japanese named directory in Japanese named DB cannot be created via PCC
49815	mkde	mkde	Status 21 returned when 84 is expected
49816	mkde	mkde	DBFILE= is not working in RenameFile data buffer.

49817	sql	sqlengine	Query with a WHERE clause working on a DOUBLE field and using the comma as decimal separator causes error in Predicate with Pervasive.SQL V8 server engine
49818	mkde	mkde	Slow connects on NetWare
49821	sql	sqlengine	Like not working correctly for certain Japanese characters on Linux servers
49845	sql	drm	Display incorrect timestamp values with DST on NetWare server
49846	sql	sqlengine	QueryTimeout is not working for connections using ServerDSN
49880	utwizards	dropdb	Certain Japanese named table cannot be created after V8 SP2
49881	interface	oledb	VB.NET program using our OLEDB provider regularly causes IIS to hang
49888	sql	drm	See esc 1945 : DRM caching of tables cause machine to run out of resource.
49891	sql	drm	DDF could not be opened in secure database
49909	sql	sqlengine	Trigger is not working when column name is a SQL Keyword
49919	devcore	csi	After V8 SP2 certain Japanese named files can no longer be opened
49921	sql	drm	Problem quering X\$Filed and X\$Index on a secured database.
49922	sql	sqlengine	RTRIM not working correctly
49946	utcorefunc	pcatalog	Deployment Wizard fails with particular combination of Project Name, DSN Name and Files to process
49950	psql		BB : Install psql8.60.ftf: SCM number change in MIF
49959	sql	sqlengine	@ @IDENTITY not displaying correct value in SP
49995	mkde	mkde	ESC 1956 : MKDE: Extended Op failed to optimize when ACS is defined
50079	interface		DTO loads libraries in DllMain causing loaded Dll to stay in memory
50100	mkde		Status 85 when Directory Name is passed on open call to NetWare
50104	mkde	nt	Debug MKDE crash in CheckClientDeadlock
50232	mkde	nt	User accounts in groups in the Pervasive_Admin group should be allowed
50257	utcorefunc	upi	UPI shouldn't autoload engine if local and CE set to Off
50258	install	psql	Increase UPI smart component numbers
50298	utpcc	sqldm	See ESC 1988 : SQLDM generates the wrong results when comments are used
50313	devcore	csi	password is no longer working in Pervasive.SQL V8 Sp2
50314	sql	sqlengine	Query performance dropped significantly in SP2 compared to v8.15 FCS
50323	utpcc	sqldm	See ESC 1991 : The V8.6 SQLDM Query Builder is unable to build a descending index
50476	interface	oledb	See ESC 2000 : Cust is getting "Table not found" error issuing a GetOleDbSchemaTable call in .NET.
50590	requester	nsl	When no name pipe port, connection take a long time
50679	devcore	csi	Add ability to detach a CSI observer
50703	interface	oledb	Insert command fails using Pervasive OLEDB provider
50818	devcore	mkc	MKC CBTRCall m_keyLength should be int, not byte
50837	sql	sqlmgr	NW abend on load nwsqmgr from mgrstart
50873	requester	mif	Status 116 when WGEs share files on Linux
51033	core_audit	monitor_audit	Unlimited user count AuditMaster license ignored
51041	mkde	cache_engine	status 8 rtned from Linux engine running Btr DOS app.
51097	utpcc	tabledesigner	PCC:Unexpected exception occurs when data is added to foreign key column.
51101	sql	sqlmgr	NW server abends in 8.6FTF nwsqmgr while running AM stress
51101	sql	sqlmgr	NW server abends in 8.6FTF nwsqmgr while running AM stress
51133	mkde	nt	Win server hung after running stress tests for 2 days
51144	sql	sqlengine	Defect for ESC 2064 (IMPAC performance issues)
51150	sql	sqlengine	Update SQL statement returns "Native Error Code 10000" when simple update trigger is on table
51158	utapps	rebuild	ESC 2060: Rebuilding data file is removing RI information.
51185	interface	oledb	OLE-DB driver creating incorrect URI strings
51221	sql	sqlengine	Sum on a left outer join returns "General Error"
51221	sql	sqlengine	Sum on a left outer join returns "General Error"
51225	install	psql	Replace Install with 8.1 codebase
51234	install		V8.5 installation fails to D:\Program Files\PSii\PVSW.
51236	mkde	nw	NetWare/debug stack overflow in AddAflToHashTable

51243	interface	oledb	OLEDB leaks memory on running simple insert loop
51243	interface	oledb	OLEDB leaks memory on running simple insert loop
51246	sql		Performance: Refinement to 51130. Best index not chosen.
51258	sql	sqlengine	Memory leak on inserting to Japanese table
51258	sql	sqlengine	Memory leak on inserting to Japanese table
51261	mkde	cache_engine	MKDE/CE: File corruption reported when workgroup engine caches a file once and later directly accesses it.
51261	mkde	cache_engine	MKDE/CE: File corruption reported when workgroup engine caches a file once and later directly accesses it.
51265	sql	sqlmgr	NetWare server hung after 5 hours with 150 Btrieve connections and 250 SQL connections.
51265	sql	sqlmgr	NetWare server hung after 5 hours with 150 Btrieve connections and 250 SQL connections.
51273	sql	sqlengine	Data Sort Error when TEMP Sytem User Variable path contains brackets
51273	sql	sqlengine	Data Sort Error when TEMP Sytem User Variable path contains brackets
51280	install	psql	Network client install does not install w32ptkun.dll locally
51281	sql		Performance: Support for INDEX hint syntax.
51306	mkde	mkde	MKDE/CE: status 2, 54 may mask network errors
51314	install	psa	Install Info for 8.7 is incorrect in the registry
51321	sql	sqlengine	Select with an OR on indexed columns is not returning correct resultset
51321	sql	sqlengine	Select with an OR on indexed columns is not returning correct resultset
51343	utwizards	createtable	Error occurs while Creating table through create table wizard
51353	sql	client	Error executing a Select on a "longvarchar" column when OEM/ANSI option is ON.
51353	sql	client	Error executing a Select on a "longvarchar" column when OEM/ANSI option is ON.
51355	mkde	mkde	Add a registry setting for the MKDE reject count.
51355	mkde	mkde	Add a registry setting for the MKDE reject count.
51380	sql	drm	Alter a NOT NULL column to a NULL column corrupted the table
51380	sql	drm	Alter a NOT NULL column to a NULL column corrupted the table
51390	sql	sqlengine	Garbage data at the end of BLOB data when inserting via SP with OLEDB ADO.NET app
51390	sql	sqlengine	Garbage data at the end of BLOB data when inserting via SP with OLEDB ADO.NET app
51417	utcorefunc	upi	PvGetDbNames returns a 7004 if server is Localhost
51417	utcorefunc	upi	PvGetDbNames returns a 7004 if server is Localhost
51430	utcorefunc	upi	ESC 2133: creating a DBN or DSN after PvConnectServer("localhost") = 7011
51430	utcorefunc	upi	ESC 2133: creating a DBN or DSN after PvConnectServer("localhost") = 7011
51438	sql	drm	Server hangs once a day, 40 users using ODBC
51438	sql	drm	Server hangs once a day, 40 users using ODBC
51445	sql	sqlengine	SQL queries in stored procedures taking a long time
51445	sql	sqlengine	SQL queries in stored procedures taking a long time
51531	requester	mif	w3scmv7.dll GPF on win16 application exit if no RESET issued
51545	sql	sqlengine	When creating a table with "not modifiable primary key", engine creates two keys instead of one.
51545	sql	sqlengine	When creating a table with "not modifiable primary key", engine creates two keys instead of one.
51583	sql		ODBC admin hangs on exit if ISA firewall client is installed
51583	sql		ODBC admin hangs on exit if ISA firewall client is installed
51588	sql	sqlengine	Query after applying SRDE FTF hangs
51588	sql	sqlengine	Query after applying SRDE FTF hangs
51659	requester	mif	Multi threaded Clarion app hangs as one thread terminates
51659	requester	mif	Multi threaded Clarion app hangs as one thread terminates
51693	communication	comsrv	ESC 2191: BSPXCOM hangs on exit if SPX not installed on NW
51693	communication	comsrv	ESC 2191: BSPXCOM hangs on exit if SPX not installed on NW
51759	utapps	functionexec	The version of Function Executor is still showing 9.00.
51807	mkde		ESC 2186: Opens slow if Archival Logging enabled
51807	mkde		ESC 2186: Opens slow if Archival Logging enabled
51822	utapps	gateway	pvlocate.exe (WGE gateway locator) version information says 8.15
51855	requester	mif	ESC 2122: Crash in WGE when a particular Japanese named user accesses local engine

51855	requester	mif	ESC 2122: Crash in WGE when a particular Japanese named user accesses local engine
51856	mkde	mkde	ESC 2231: Validate request is logging invalid requests from brequest that are in fact valid.
51856	mkde	mkde	ESC 2231: Validate request is logging invalid requests from brequest that are in fact valid.
51869	sql	sqlengine	Memory leaks in SQLMgr
51869	sql	sqlengine	Memory leaks in SQLMgr
51875	install		Custom installer dialogs are garbage
51899	sql	drm	Crash in engine using VBScript with a UNC path
51899	sql	drm	Crash in engine using VBScript with a UNC path
51919	install		Japanese release has incorrect license agreement
51936	mkde	mkde	Status 170/171 in ContOps on NT requiring restart of MKDE.
51936	mkde	mkde	Status 170/171 in ContOps on NT requiring restart of MKDE.
51973	utpcc		PCC:Not able to call Stored procedure
51973	utpcc		PCC:Not able to call Stored procedure
51982	sql	drm	Select on Altered columns throws Chunk offset too long
51982	sql	drm	Select on Altered columns throws Chunk offset too long
51984	sql	sqlengine	Running SQL statement leads to 100% CPU and does not return
51984	sql	sqlengine	Running SQL statement leads to 100% CPU and does not return
51992	interface	oledb	In the TestCase(TestCase: ADOX) of OLEDB regression(Win 2KServerSP4Spanish), the Drop tables is failing.
51992	interface	oledb	In the TestCase(TestCase: ADOX) of OLEDB regression(Win 2KServerSP4Spanish), the Drop tables is failing.
51996	mkde	mkde	ESC 2234: Determine if "remote" connection is from local machine calling license manager
51996	mkde	mkde	ESC 2234: Determine if "remote" connection is from local machine calling license manager
52011	sql		SRDE cannot create certain Japanese named tables on FedoraCoreLinux
52011	sql		SRDE cannot create certain Japanese named tables on FedoraCoreLinux
52014	sql	client	Pass actual CI version to the engine
52014	sql	client	Pass actual CI version to the engine
52019	install	psa	During PSA Archive,PSQL entry in Control panel entry,registry entries,psql.ico & Pervasive.Sql.isu under pvsw and pvnetpass.exe under pvsw\bin are not getting archived.
52020	install	psa	Restoring through PSA is displaying some error screen.
52021	install	psa	PSATESTS when run in Client in Silent mode, transactional test is failing .
52022	install		Opening the tables in Defaultdb is displaying some error screen.
52024	install	psa	In case of PSQLV8.7 Server,If we archive and restore WGE entry is coming up in the Registry along with Server Engine entry.
52044	requester	mif	ESC 2266: WBTRVSTOP leads to crash in pscore.dll
52044	requester	mif	ESC 2266: WBTRVSTOP leads to crash in pscore.dll
52045	mkde	nt	Status 2 returned from Btr DOS app calling GetNext
52051	sql	drm	Query with DESC order is not returning any record. ASC order works fine.
52051	sql	drm	Query with DESC order is not returning any record. ASC order works fine.
52063	interface	oledb	convert testcase fails in OLEDB regression
52063	interface	oledb	convert testcase fails in OLEDB regression
52068	install	psql	Install background screens say copyright 2003 should say 2005
52077	install		CLASSPATH is set wrongly by 8.7 install
52086	utwizards	psa	On Silent upgrade(V8.5 FCS+ V8.7), v8.5 entry is not removed from Add/Remove Programs
52094	install		After upgradation from V8.6 to V8.7,while uninstalling,if we first remove PSQLV8.7 and PSA entries from control panel many files in PVSW\bin are getting remained.
52105	utwizards	psa	Title of PSAlog file is out of date
52110	install	psa	W98 PSA installs different version of ODBC setup files
52113	install		In Ptksetup.ini,Icon Key under [PSA] section is not working.
52119	install		Sample database file not installed with correct permission level on Linux
52127	install	uninstall	NetWare uninstall not removing registry entries on client
52144	sql	sqlengine	SQL Slow after upgrading to V8 SP2
52144	sql	sqlengine	SQL Slow after upgrading to V8 SP2

52156	sql	sqlengine	When searching for a string where the LAST character is a single quote NOTHING is found.
52157	communication	commheaders	w16pnsi.exe needs to be updated to use new calling parameters
52158	install	psa	PSA is incorrectly labeling files as PSQL 2000 and V8
52160	install	psa	During Upgradation, if we do the custom installation of the lower version,then the installation of V8.7 is going for complete installation
52161	install	psa	After Upgrading from any lower version to PSQLV8.7,if we archive PSQLV8.7,few files in bin are still remained.
52164	install		Severe install error during V8 SP3J install after uninstall
52165	install		DDFs left behind in c:\pvs\w\samples after uninstall
52175	devcore	csi	Short path caused status 170 when used Function Executor to open a btrieve file.
52181	requester	nsl	Once the name_pipe call fail to a downed server NSL won't retry at all after that causes Status 171.
52185	install		Copyright information on installer splash screen is old
52186	requester		Copyright information on splash screen is old
52192	mkde	mkde	Engine crash due to memory corruption involving fully qualified domain names
52192	mkde	mkde	Engine crash due to memory corruption involving fully qualified domain names
52194	install	psql	History.txt should be removed from installer
52199	install	psql	NW install not creating DefaultDB database
52235	utpcc		DSN Description is garbled with databases created from a Windows client via PCC
52236	sql	sqlengine	Esc 2337 : On running certain mis-joint (left outer joint and traditional joint) SQL statement causes CPU usage goes to 100%
52236	sql	sqlengine	Esc 2337 : On running certain mis-joint (left outer joint and traditional joint) SQL statement causes CPU usage goes to 100%
52258	sql	drm	data corruption when altering multiple BLOB columns
52291	sql	sql	Data returned in a given column of a database table for the same record differs depending on the SQL statement used
52291	sql	sql	Data returned in a given column of a database table for the same record differs depending on the SQL statement used
52297	sql	client	End of Column data cut off on SQL requests from Linux clients
52297	sql	client	End of Column data cut off on SQL requests from Linux clients
52322	sql	sqlengine	Btrieve Error 8 seen on running LEFT JOIN SQL statement
52322	sql	sqlengine	Btrieve Error 8 seen on running LEFT JOIN SQL statement
52354	sql	sqlengine	SQL query is failing because of column case sensitivity in the ORDER BY clause. To reproduce the problem run the following query with the given database.
