

Ramp-Up Fast With Enterprise-Level Training and Support

Proven Methods to Accelerate Large Integration Projects

Looking for a way to speed large-scale integrations while maximizing your return on investment?

Then consider Enterprise Fast Track Training and Implementation from Pervasive. This comprehensive service offering is ideal for the large enterprise that wants quick yet thorough ramp-up on product knowledge, architectural design, and initial implementation.

Our experienced professionals will provide your organization with immediate working knowledge of the entire Pervasive integration development environment, including extensive product training, customized knowledge transfer, and in-depth implementation support.

Services also include complete enterprise architectural assistance in designing an enterprise-level integration plan for maximum efficiency. All services are backed by Pervasive experience in implementing successful, large-scale integration projects for organizations like yours.

The result is a powerful, efficient service solution that can reduce project lead times, boost productivity, and increase your speed to value.

Critical Benefits for the Large Organization

With Enterprise Fast Track Training and Implementation and Pervasive software, you can:

- **Accelerate large-scale deployment and speed ROI.** Intensive training, an efficient architectural design, and customer-focused implementation techniques help shorten the learning curve and allow a quicker return on your investment in Pervasive software.
- **Quickly develop integrations to fit your needs.** A flexible architecture, open repositories, and powerful integration engines fully support large-scale, distributed integration solutions across the enterprise.
- **Minimize your overall integration costs.** Streamlined implementation methods, an architecture built for efficient development, and Pervasive expertise mean lower costs throughout the integration process.
- **Leverage Pervasive experience and expertise with large-scale integrations.** Pervasive professionals have designed and deployed large-scale integration projects for large organizations around the world. We have the tools, product knowledge and proven methodologies that can help you optimize integration at every level.

Enterprise Fast Track Training and Implementation Deliverables

Design Phase

Pervasive Professional Services will provide three days of Discovery and Architectural Design in your environment. Work will include a preliminary design document for using Pervasive integration products to meet your project goals and match your organizations work flow requirements.

Training Phase

Pervasive Professional Services will provide three days of hands-on product training in your environment. This will ensure that your staff understands the capabilities of the Pervasive integration products and how they are leveraged in the architectural design. The training can occur before, after, or concurrent with the architectural design session, depending on your own requirements.

Implementation Phase

After product training and design, our representative will remain as needed to implement the plan determined in the architectural sessions. This ensures that your staff fully understands all project requirements and the tasks required to implement them.

Note: Pervasive will incur the cost of our representative's travel expenses.

Customer Essentials

To facilitate the success of the training and implementation offerings, customers will be asked to—

- Provide a signed Pervasive training agreement
- Participate in an initial Discovery telephone call with Pervasive to determine scope and capabilities of what can reasonably be accomplished during the engagement

Although not a requirement, sample data before the engagement would be beneficial.

The Best Support You'll Find for Pervasive Solutions

Of course, nobody knows more about Pervasive solutions than we do. Pervasive Professional Services works closely with Pervasive developers and technicians to ensure that our service offerings reflect the very latest advances in Pervasive technology and methods.

With over 20 years experience in developing Pervasive technology for data integration and infrastructures, we will always be your best choice for integration solutions, regardless of project size or type.

Part of a Comprehensive Range of Services

Pervasive services include our worldclass PRIME™ Methodology for rapid implementation, 24/7 online support, training programs, application integration, post-production support, and ongoing consultation.

Whatever your needs, we can work with you to develop flexible, efficient, and cost-effective solutions. And with package pricing for many services, you'll recognize reduced costs as you continue to enhance your Pervasive solutions.

Take Costs Out of Integration

Talk to us today. We'll be glad to tell you how Pervasive solutions can take costs out of integration and accelerate your speed to value.
